## PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building scalable cross-platform mobile applications using Flutter and Dart. Skilled in state management, clean architecture, backend integration, and production-ready mobile app development. Built multiple real-world applications featuring authentication, payments, notifications, cloud media handling, and local persistence. Experienced in mentoring developers, leading technical roadmaps, and maintaining high code quality through structured reviews and engineering practices.

## CORE SKILLS

**Mobile Development:** Flutter, Dart, Responsive UI, Animations

**State Management:** Bloc, Cubit

**Architecture:** MVVM, Clean Architecture, OOP, SOLID

**Backend & APIs:** REST APIs, Firebase (Auth, Firestore, FCM), Supabase, Cloudinary

**Storage:** SQLite, Hive, Shared Preferences

**Integrations:** Stripe

**DevOps & CI/CD:** Git, GitHub, GitHub Actions, Fastlane, Firebase App Distribution

**Testing:** Unit Testing, Integration Testing

**Other:** Flavors, Localization, Theming

## EXPERIENCE

**Flutter Head** | *Break-in Point Team*

*Apr 2026 – Present*

- Mentored and trained 10+ Flutter developers through structured learning roadmaps and hands-on technical guidance.
- Led task planning, sprint distribution, and code review processes to improve team productivity and code quality.
- Established engineering practices around scalable architecture, clean code, and maintainable Flutter development.

**Flutter Developer Intern** | *INFOSAS*

*Aug 2025 – Sep 2025*

- Developed production-grade e-commerce mobile application features using Flutter and Dart.
- Implemented responsive UI components and collaborated on scalable feature delivery in a professional development team.
- Contributed to backend integration and production-ready application workflows.

## SELECTED PROJECTS

**Rise — Real Estate Platform** [\[APK Link\]](#)

Cross-platform property marketplace with listing management, user publishing, media uploads, and push notifications using Firebase and Cloudinary.

**Cartsy — E-Commerce App** [\[GitHub\]](#)

Shopping applications feature cart management, checkout flow, local persistence, and Stripe payment integration.

**Toba — Quran and Islamic App** [\[GitHub\]](#)

Islamic application featuring Quran reading, Azkar, bookmarks, prayer times, and personalized reading themes.

**Cine Scope — Actors News App** [\[GitHub\]](#)

Dynamic actors news application using REST APIs with structured state management and scalable architecture.

## EDUCATION

**Bachelor of Engineering — Computer Science & Control Systems**

*Faculty of Engineering | 2023 – Present*

## LEADERSHIP & CONTENT

---

- Technical content creator teaching Flutter and Dart on YouTube.
- Active open-source developer with public projects on GitHub.
- Strong focus on software craftsmanship, scalable architecture, and developer mentorship.
