PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building scalable cross-platform mobile applications using Flutter and Dart. Skilled in state management, clean architecture, backend integration, and production-ready mobile app development. Built multiple real-world applications featuring authentication, payments, notifications, cloud media handling, and local persistence. Experienced in mentoring developers, leading technical roadmaps, and maintaining high code quality through structured reviews and engineering practices.

CORE SKILLS

Mobile Development: Flutter, Dart, Responsive UI, Animations
State Management: Bloc, Cubit
Architecture: MVVM, Clean Architecture, OOP, SOLID
Backend & APIs: REST APIs, Firebase (Auth, Firestore, FCM), Supabase
Storage: SQLite, Hive, Shared Preferences
Integrations: Cloudinary, Stripe
DevOps & CI/CD: Git, GitHub, GitHub Actions, Fastlane, Firebase App Distribution
Testing: Unit Testing, Integration Testing
Other: Flavors, Localization, Theming

EXPERIENCE

Flutter Head | *Break-in Point Team* *Apr 2026 – Present*

- Mentored and trained 10+ Flutter developers through structured learning roadmaps and hands-on technical guidance.
- Led task planning, sprint distribution, and code review processes to improve team productivity and code quality.
- Established engineering practices around scalable architecture, clean code, and maintainable Flutter development.

Flutter Developer Intern | *INFOSAS* *Aug 2025 – Sep 2025*

- Developed production-grade e-commerce mobile application features using Flutter and Dart.
- Implemented responsive UI components and collaborated on scalable feature delivery in a professional development team.
- Contributed to backend integration and production-ready application workflows.

SELECTED PROJECTS

Rise — Real Estate Platform [APK Link]
Cross-platform property marketplace with listing management, user publishing, media uploads, and push notifications using Firebase and Cloudinary.

Cartsy — E-Commerce App [GitHub]
Shopping applications feature cart management, checkout flow, local persistence, and Stripe payment integration.

Toba — Quran and Islamic App [GitHub]
Islamic application featuring Quran reading, Azkar, bookmarks, prayer times, and personalized reading themes.

Cine Scope — Actors News App [GitHub]
Dynamic actors news application using REST APIs with structured state management and scalable architecture.

EDUCATION

Bachelor of Engineering — Computer Science & Control Systems
Faculty of Engineering | 2023 – Present

LEADERSHIP & CONTENT

- Technical content creator teaching Flutter and Dart on YouTube.
- Active open-source developer with public projects on GitHub.
- Strong focus on software craftsmanship, scalable architecture, and developer mentorship.
