Abdelrahman Ali

Junior Flutter Developer

+201142177321 | Egypt-Gharbia | abdelrahmanalielgamal@gmail.com | Linked In | GitHub | YouTube channel | Portfolio

Professional Summary

Flutter Developer with practical experience in building cross-platform mobile applications using Flutter and Dart. Developed multiple real-world projects including apps with Firebase Authentication, Firestore database, and Cloudinary integration. Experienced in REST API integration, responsive UI design, and state management using Bloc. Strong understanding of mobile app architecture, Git workflows, and scalable development practices. Passionate about solving problems and building production-ready applications for Android and iOS.

Technical Skills

Flutter, Dart, Bloc, Cubit, OOP, SOLID, REST APIs, MVVM, Clean Architecture
Firebase, Cloudinary, Supabase, Stripe, Git, GitHub, GitHub Actions, Fastlane, Firebase Distribution
Hive, Shared Preferences, SQLite, Dio, HTTP, Unit Testing, Integration Testing, Flavors, Localization, Theming

Work Experience

Flutter Developer Intern **(INFOSAS) |** 08/2025 – 09/2025

Flutter Head **(Break-in Point Team) |** 04/2026 – Present

Projects

Rise – Real Estate App (apk link)

Real estate platform with mobile app and admin dashboard for browsing and managing properties.

Key Features:

- Browse and filter real estate listing (buy, sell, rent)
- Users can add and publish their own properties
- Admin dashboard for managing listings and users
- Images and videos upload and management using Cloudinary
- Push notifications using Firebase Messaging

Technologies Used: Flutter, Firebase Authentication, Firebase Firestore, Firebase Cloud Messaging, Cloudinary, REST APIs, MVVM Architecture

Cartsy – E-commerce App (GitHub)

Shopping app for products, cart, and orders.

Key Features:

- Browse products with categories and details
- Add/remove products from cart
- Place and manage orders
- User-friendly shopping flow (products → cart → checkout using)

Technologies Used: Flutter, Firebase Authentication, REST APIs, SQLite, Stripe Payment Integration, MVVM Architecture

Toba – Quran & Islamic App (GitHub)

Quran app with Azkar, prayer times, and personalization.

Key Features:

- Full Quran reading with organized Surahs
- Daily Azkar
- Accurate prayer times display
- Users can change Surah page color (reading theme customization)
- Bookmark pages to save reading progress

Technologies Used: Flutter, Local Storage (Shared Preferences), State Management (Cubit)

Cine Scope – Actors News App (GitHub)

Actors and entertainment news app using APIs.

Key Features:

- updates for actors' information news
- Detailed pages for actors' content
- API-based dynamic content loading

Technologies Used: Flutter, REST APIs, State Management (Cubit), MVVM Architecture
